

OpenMates

**Digital team mates
For all of us.**

Designed & built by

Problem

ChatGPT, Claude, Gemini & co are poorly developed products and will always remain so, because of core weaknesses.

Maximum profit over maximum user happiness.

Enterprise focus, further increasing inequality

Engineering focus instead of UX design focus.

Billions of investment → Enshittification guaranteed

Closed ecosystem → limited usability

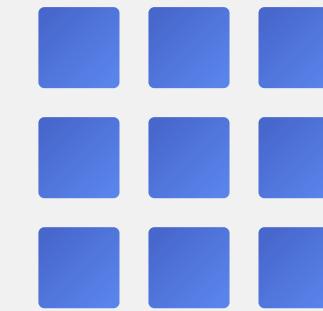

Open source alternatives: great ideology, bad usability

Solution

A better ChatGPT. Built for users, not for shareholders.

Focus on everyday users, freelancers & small businesses.

Open source path as insurance policy against enshittification

Focus: Best possible products for users, not max greed.

Privacy & security focus by default

Open ecosystem, long term independency & sustainability

Goal

Creating the one super app for most daily tasks.
Focused on the best user experience & privacy by default.

Apps

The core to make AI agents actually useful & reliable.

How apps work

Every app has four aspects:

Skills

Singapore airport via Brave Search
+ 9 more

best video transcription APIs 2025 via Brave Search + 9 more

cosplay conventions 2026 via Brave Search

Search Processing...

Focus modes

Scenario Planning

Business plan

Plan podcast

Security review

Plan event

Career insights
Focus activated

Providers

II A H

e G N R

Provider icons: a box with a pencil, a green icon with a Z, a blue icon with a P, a green icon with a Q, a colorful icon with a P, and an orange icon with an N.

Suggestions, which of my software projects I should focus on more in my free time?
